Fun Run Task

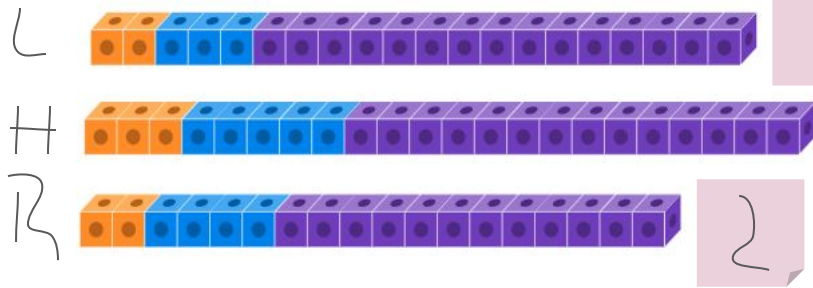

Squishies come in bags of 10. How many bags of squishies do we need to buy to have enough for all of the first graders?

Keep track of your work and use numbers, pictures, or words to show how you made your decision.

Alistair

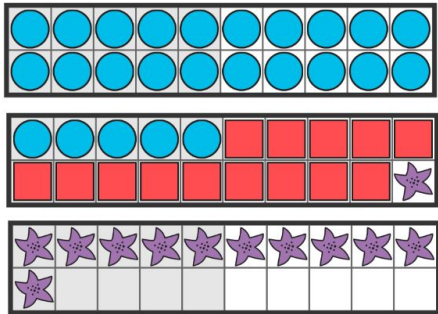

"First I thought 7 but it's really 6."

76

Ivy

21 squishies

"I counted each row by tens: 10, 20, 30, 40, 50 and 1 for 51."

Charlotte

"I got 6 bags... First I made tens from the fives because those are easy to buy. Then I circled the rest in tens."
